

ATTENTION DEFICIT DISORDER EVALUATION SCALE - Fifth Edition (ADDES-5)

Stephen B. McCarney, Ed.D. & Samm N. House

© 2019

The *Attention Deficit Disorder Evaluation Scale - Fifth Edition (ADDES-5)* enables educators, school and private psychologists, pediatricians, and other medical personnel to evaluate Attention-Deficit/Hyperactivity Disorder in children and youth from input provided by primary observers of the student's behavior. The **ADDES-5** was developed from research in behavior disorders, learning disabilities, and Attention-Deficit/Hyperactivity Disorder; current literature in psychology, neurology, and education; and current practices in identification and diagnosis. The subscales, **Inattentive** and **Hyperactive-Impulsive**, are based on the current characteristics of ADHD. The results provided by the scale are commensurate with criteria used by educational, psychiatric, and pediatric professionals to identify Attention-Deficit/Hyperactivity Disorder in children and youth. The scale is available in two versions: **School Version** (60 items), a reporting form for educators, and **Home Version** (46 items), a reporting form for parent/guardian input.

During development, the **ADDES** was field tested at all grade levels (K-12) which resulted in the items included in the final version of each scale. The **ADDES-5 School Version** was standardized on a total of 4,829 students including students identified with Attention-Deficit/Hyperactivity Disorder 5 through 17 years of age. Separate norms are provided for males and females.

Internal consistency was .99 for the total score. Test-retest reliability coefficients exceeded .91 for each of the subscales. Coefficients for inter-rater reliability of the subscales ranged from .85 to .90 for all age levels. Content validity was established through the initial development process. The scale was compared to the *Conners' 3™ Teacher Short* and the *ADD-H Comprehensive Teacher's Rating Scale-Second Edition* as measures of concurrent validity. Item performance correlated positively with total score performance, further substantiating the internal cohesiveness of the scale as a measure of Attention-Deficit/Hyperactivity Disorder.

The **ADDES-5** uses frequency-referenced quantifiers. Each item on the **ADDES-5** is rated on a six-point scale from (0) NOT DEVELOPMENTALLY APPROPRIATE FOR AGE to (5) ONE TO SEVERAL TIMES PER HOUR. Following administration, four types of scores may be obtained: frequency rating for individual items (reflecting the frequency and severity of the behavior), subscale standard score, quotient, and percentile rank (to establish a consistent basis for comparing students). From the subscale standard scores, a profile of the student's behavior across the subscales is constructed.

The **ADDES-5** takes approximately 20 minutes to complete and can be completed by anyone familiar with the student: the classroom teacher, clinical personnel, other school personnel, or the parent/guardian. The **ADDES-5** complete kit consists of *Pre-Referral Attention Deficit Checklists*, *Intervention Strategies Documentation Forms*, school and home version rating forms and technical manuals, the *Attention Deficit Disorder Intervention Manual - Revised*, and the *Parent's Guide to Attention Deficit Disorder*.

The *Attention Deficit Disorder Intervention Manual - Revised (ADDIM-R)* includes goals, objectives, and intervention strategies for all behaviors on the scale and was designed for the easy development of a student's IEP, as well as classroom intervention. The *Parent's Guide to Attention Deficit Disorder (PGADD)* contains interventions for parents to implement in the home to help their child be more successful in the home environment. The *Attention Deficit Disorder Intervention Manual - Revised (216 pages, © 2021)* and the *Parent's Guide to Attention Deficit Disorder (390 pages, © 1995)* used in conjunction with the **ADDES-5** provide a comprehensive assessment, diagnostic, and intervention program for children with Attention-Deficit/Hyperactivity Disorder. The **ADDES-5 Quick Score** computer program converts raw scores to standard and percentile scores. The *Attention Deficit Disorder Intervention Manual-Revised* computer program provides an individualized report of IEP goals, objectives, and specific intervention strategies selected for a student.

SCHOOL VERSION RATING FORM

Stephen B. McCarney

RATING GUIDELINES

- The student should be rated by educational personnel with primary observational opportunities who work directly with the student during instructional situations.
- The rater should conduct his/her ratings independently, without conferring with others.
- The rater should rely on his/her observation of the student's behavior as it occurs naturally in the educational environment.
- It is recommended that the rater read each quantifier with the item, before rating the item. Using item 13 as an example, the rater would first read, "Not developmentally appropriate for age to lose place when reading (e.g., too young to read)," then "Not observed losing place when reading," then "One to several times per month loses place when reading," then "One to several times per week loses place when reading," then "One to several times per day loses place when reading," and finally, "One to several times per hour loses place when reading."
- It is not necessary to complete the rating of a student in one day. Several days may elapse before the rater is able to complete the scale.
- If the behavior/skill is developmentally beyond what is expected for the student's age, the rating should be

0

NOT DEVELOPMENTALLY APPROPRIATE FOR AGE.

- If the rater has not personally observed the student display a specific behavior(s), the rating should be

1

NOT OBSERVED.

- If the rater has had the opportunity to observe the student for more than one month and has observed the behavior one to several times (i.e., one to three times), the rating should be

2

ONE TO SEVERAL TIMES PER MONTH.

- If the behavior has been observed one or more times per week, even several times per week (i.e., one to three times), the rating should be

3

ONE TO SEVERAL TIMES PER WEEK.

- If the behavior has been observed at least once a day or more than one time a day (i.e., one to three times), the rating should be

4

ONE TO SEVERAL TIMES PER DAY.

- If the behavior has been observed at least once an hour or multiple times per hour, the rating should be

5

ONE TO SEVERAL TIMES PER HOUR.

IMPORTANT *** PLEASE NOTE: *** IMPORTANT

1 28. Does not read or follow written directions (e.g., instructions for homework, assignment directions, etc.)

1 29. Changes from one activity to another without finishing the first, without putting things away, before it is time to move on, etc.

68 Raw Score

SUBSCALE 2

1 30. Does not follow school rules (e.g., runs in hallways, throws food in cafeteria, is disruptive in library, etc.)

1 31. Begins assignments before receiving directions or instructions or does not follow directions or instructions

1 32. Does not wait his/her turn in activities or games

1 33. Grabs things away from others

1 34. Blurts out answers without being called on

1 35. Interrupts the teacher (e.g., begins to talk while the teacher is talking, goes to the teacher while the teacher is talking to other students, etc.)

2 36. Interrupts other students when they are talking

3 37. Talks to other students during class or activity periods

1 38. Moves about unnecessarily, fidgets, squirms, etc.

1 39. Appears restless (e.g., shifts position in seat, paces about, etc.)

1 40. Is easily angered, annoyed, or upset (e.g., hits, argues, yells, throws things, cries, withdraws, etc.)

4 41. Bothers other students who are trying to work, listen, etc.

3 42. Makes unnecessary comments or noises in the classroom (e.g., talks to other students without permission, interrupts, makes fun of others, hums, taps, burps, etc.)

2 43. Makes unnecessary physical contact with others (e.g., touches, hugs, etc.)

1 44. Is impulsive (e.g., reacts immediately to situations without thinking, is impatient, fails to wait for a turn or for assistance from an instructor, etc.)

4 45. Fails to comply with teachers or other school personnel (e.g., refuses to do what he/she is told, goes on doing what he/she was doing, does the opposite of what he/she is told, etc.)

2 46. Ignores consequences of his/her behavior (i.e., knows that his/her behavior will result in a negative consequence but engages in the behavior anyway)

1 47. Fails to follow a routine (e.g., does things out of order, does not wait for an activity at the scheduled time, etc.)

1 48. Does not follow the rules of games

1 49. Leaves seat without permission

1 50. Does not work productively (e.g., does not work productively with peers)

1 51. Moves about unnecessarily when moving from one activity to another instead of walking

1 52. Engages in nervous habits (e.g., twirls pencils, plays with things in desk, spins rulers on pencils, clicks ballpoint pens, repeatedly sharpens pencils, etc.)

1 53. Talks beyond what is expected or at inappropriate times

1 54. Does not wait appropriately for assistance from instructor

1 55. Does not adjust behavior to expectations of different situations (e.g., gets excited at recess and does not settle down, etc.)

1 56. Engages in inappropriate behaviors while seated (e.g., tips chair or desk, puts feet on desk, touches others as they walk by, taps and makes noises, etc.)

2 57. Becomes overexcited (e.g., loses control in group activities, becomes loud, etc.)

2 58. Demonstrates inappropriate behavior when moving with a group (e.g., fails to stay in line, runs, pushes, etc.)

3 59. Moves about unnecessarily (e.g., leaves seat, walks around the classroom, rocks, shakes head, etc.)

4 60. Engages in nervous habits (e.g., bites fingernails, twirls hair, chews inside of cheek, chews pencils or pens, spins or twirls objects, etc.)

5 36. Appears restless (e.g., fidgets, changes position in seat, paces, etc.)

2 37. Does not respond to directions

5 38. Exhibits extreme behavior to expectations in different situations (e.g., gets excited at playground and does not settle down, etc.)

5 40. Becomes overexcited (e.g., loses control in group activities, becomes loud, etc.)

3 41. Climbs on things

5 42. Moves about unnecessarily (e.g., walks around, rocks, shakes head, etc.)

5 43. Runs in the house, does not sit appropriately on the furniture, yells, etc.

5 44. Runs in the shopping mall, pushes and makes noises in line at the movies, yells in stores, etc.

5 45. Makes excessive noise

3 46. Behaves inappropriately when riding in the car (e.g., refuses to wear a seat belt, throws things out the window, fights with others, etc.)

III. Goals, Objectives, and Interventions

1 Rushes through assignments with little or no regard for accuracy or quality of work

Goals:

1. The student will improve the accuracy of school assignments.
2. The student will improve the quality of school assignments.

Objectives:

1. The student will perform school assignments with _____% accuracy.
2. The student will check school assignments to correct errors on _____ out of _____ trials.
3. The student will turn in school assignments for the teacher to proofread and provide feedback for corrections and improvement on _____ out of _____ trials.
4. The student will re-do corrected school assignments with _____% accuracy.
5. The student will have a peer check his/her school assignments and correct errors found on _____ out of _____ trials.

Interventions:

1. Allow the student to perform schoolwork in a quiet place (e.g., study carrel, library, resource room, etc.) to reduce distractions.

2. Assign the student schoolwork that requires a preliminary evaluation of the increasing accuracy and quality of the student's assignment. Require

3. Support the student to make necessary changes before final grading.

4. Establish any stated criteria for accuracy and quality.

5. Have the student read/go over schoolwork with the teacher so the student can become more aware of the accuracy and quality of his/her work.

6. Provide the student with samples of work as models for acceptable levels of quality (e.g., the student is to match the quality of the sample before turning in the assignment).

7. Provide the student with additional time to perform schoolwork to achieve increased accuracy and quality.

8. Teach the student procedures for improving his/her quality of work (e.g., listen to directions, make sure directions are understood, work at an acceptable pace, check for errors, correct for neatness, copy the work over, etc.).

11. Establish levels of expectations for accuracy and quality of assignments. Require the student to correct or redo assignments until the expectations are met.

12. Provide the student with quality materials to perform the assignment (e.g., pencil with eraser, paper, dictionary, handwriting sample, etc.).

13. Make sure that all educators who work with the student maintain consistent expectations of accuracy and quality.

14. Have the student ask questions about directions, explanations, or instructions not understood.

15. Assess student performance in a variety of ways (e.g., have the student give verbal explanations, simulations, physical demonstrations, etc.).

Intervention Manual - Revised**

II. Behaviors and Interventions

1 Is easily distracted by other things in the home

1. Carefully consider if your child is capable of performing the responsibilities expected of him/her. Do not give your child too many chores to do at once; make sure he/she gets up early enough to get to school on time; provide more than enough time to perform a responsibility, etc.; and do not expect perfection.

2. Establish rules for performing everyday expectations (e.g., get up on time for school, do your chores right after you get home from school, finish your homework before you watch TV, etc.). These rules should be consistent and followed by everyone in the home. Talk about the rules often.

3. Establish a routine for your child to follow when getting ready for school, performing chores, doing homework, etc. This will help your child remember what is expected.

4. Reward your child for getting things done without becoming distracted. Use verbal praise (e.g., "Good job for getting things done on time." "You finished your homework before watching TV." etc.), a hug, having a friend over to play, getting up late, watching a favorite TV show, and playing a game with a parent. (See Appendix for Reward Menu.)

5. If there are other children or adolescents in the home, reward them for getting things done without becoming distracted.

6. Model for your child the appropriate ways to get things done without becoming distracted. Show your child how to follow a routine by following one yourself and getting things done on time.

7. Make certain that your child sees the relationship between behavior and the consequences which follow (e.g., failing to feed the dog will cause the dog to get hungry).

8. When your child does not get something done because he/she was distracted, explain exactly what he/she did wrong, what should have been done and why.

For example: Your child is supposed to catch the school bus at 7:45 a.m. but is still getting dressed when the bus arrives. Go to your child and explain that the bus was missed because he/she was not ready on time. Explain that it is unacceptable to miss the bus because you don't have time to take him/her to school.

9. Write a contract.

For example: "I will be waiting for the bus in a car for extra time."

SAMPLE
Parent's Guide to Attention
Deficit Disorder

...written within the ability of your child and should focus on only one behavior at a time. (See Appendix for an example of a Behavior Contract.)

10. Allow natural consequences to occur due to your child becoming distracted and not getting things done (e.g., a pet goes hungry if not fed, possessions are lost if not put away, etc.).

11. Along with a directive, provide an incentive statement (e.g., "After you get ready for bed, you may watch TV.").

12. Provide your child with written reminders (e.g., a list posted in the bathroom, indicating what his/her chores are and when they need to be done). (See Appendix for List of Chores.)

13. Tell your child when it is time to set the table, feed the dog, etc.

14. Limit the number of chores for which your child is responsible and gradually increase the number of chores as your child demonstrates the ability to get them done on time without becoming distracted.
