## **Table of Contents**

I.		g the Autism Spectrum Disorder Intervention Manual in conjunction with the panion evaluation scale
II.	Goal	ls, Objectives, and Interventions
	Beha	avior
	Num	nber
		Appears not to hear others' social initiations
		Does not accept an item presented to him/her by others
		Is unable to take turns
		Does not socially interact/reciprocate with others
		Demonstrates difficulty maintaining topic of conversation
		Remains fixated on personal topics of interest in conversation with others
		Reacts inappropriately to extreme emotions of others
		Is unable to understand others' view point
		Does not communicate for the purpose of sharing positive affect
		Does not imitate others' actions
		Closes eyes when spoken to, as if the person speaking is not there
		Does not respond to social praise, is not motivated by social praise
		Becomes physically aggressive when he/she doesn't get his/her way
		Demonstrates limited communication skills
		Does not respond to others' communication initiations
		Is unable to participate in conversational turn taking
		Says one thing, but means another
		Interprets comments literally
		Does not ask questions when confused, but instead ignores others or changes the subject . 92
		Does not ask for things he/she wants
		Has language and uses it to get needs met, yet is unresponsive to the communicative
	22.	needs of others
	23.	Has difficulty, or is unable to imitate others' verbalizations when asked
	24.	Avoids looking directly into others' eyes or cannot hold eye contact for appropriate
		amount of time
	25.	Overly obsessive about looking into others' faces/eyes
	26.	Does not show change in emotion through facial expressions
		Is overly animated in facial expressions
	28.	Exhibits odd facial expressions for no apparent reason
	29.	Is unable to interpret nonverbal facial cues of others
		Is overly sensitive to visual stimulus
		Needs to be reminded to look at objects or tasks
		Stares "through" other people
		Does not respond to his/her name spoken by others
		Plays alongside others with the same or similar objects, but rarely plays or interacts with others
		Prefers inanimate objects over interaction with people
		Requires excessive reassurance when changes occur in environment or typical situations . $.152$
	37.	Prefers to play alone

38.	Appears aloof or distant from others near him/her	163
39.	Does not exhibit awareness of social codes of conduct or does not learn appropriate	
	behavior from observing such behaviors	167
40.	Does not realize how his/her actions affect others	173
41.	Does not use other's emotional responses to guide behavior	179
42.	Does not initiate play with others	184
43.	Observes others playing, but does not join others to play	. 189
44.	Does not know how to pretend when playing	
45.	Has difficulty assuming role reversals in play	
46.	Has difficulty understanding or accepting others' point of view	
47.	Has difficulty identifying personal space preferences of others	206
48.	Has difficulty communicating personal space preferences to others	211
49.	Uses others as tools for communication	216
50.	Inappropriately overgeneralizes a learned skill into a novel situation	
51.	Spins toys	225
52.	Lines toys up in a systematic order	
53.	Demonstrates unusual tone of voice	
54.	Uses unusual speech patterns that are overly precise and pedantic or speaks in a	
	singsong manner	239
55.	Uses personal pronouns inappropriately	
56.	Inappropriately uses newly learned communication skills in novel and familiar	
	communicative situations	246
57.	Able to repeat whole commercials or videos, but not able to use language to meet	
	wants or needs	250
<b>5</b> 0		
58.	Develops idiosyncratic meanings for words or phrases in which words or phrases have	
58.	Develops idiosyncratic meanings for words or phrases in which words or phrases have an associated affective meaning for him/her based on prior experience	255

Inappropriately seeks auditory input (e.g., makes unique noises in order to meet sensory needs, etc.).  Uses objects in inappropriate ways in order to gain auditory input.  Hums or uses other vocal stimulations to tune out surrounding noises  Stares off into space  Moves body or objects in such a way as to provide visual stimulus.  Seeks out different movement activities  Demonstrates self-stimulatory behaviors in order to gain sensory input  Bodily postures are odd or extreme with little or no variation.  Walks with an unusual gait.  Toe walks the majority of the time.  Develops predictable routines with toys/materials.  Tends to be a perfectionist.	258 263 268 272 275 279 283 286 289 293 297 301 307 313 317 319 321 325 330

80.	Resists changing to seasonal clothing	.347
81.	Demonstrates inappropriate behaviors in order to avoid exposure to various texture	
	experiences	
82.	Has a limited diet	
83.	Explores objects by mouthing or licking	
84.	Inappropriately smells different objects/people as a means of exploring the environment	
85.	Smells all food prior to eating it	
86.	Refuses to participate in paper/pencil activities	
87.	Becomes overly anxious or agitated when items are moved or disturbed, or when routines are changed	
88.	Demonstrates persistent preoccupation with parts of objects	.377
89.	Plays with unusual items compared to those typically played with by other children	.381
90.	Develops attachment to nonessential objects and carries that object with him/her at all times	.384
91.	Has language, but perseverates on one topic of interest the majority of time	.388
92.	When engaged in activity, focuses solely on a single object or part(s) of object(s) even though a wide variety of objects are available for use	
93.	Engages only in activities which focus on personal topics of interest	
94.	Patterns of interest are unusual in level of intensity or focus	
95.	Focuses on details rather than whole objects	
96.	Visual preoccupation with straight lines	
97.	Is overly sensitive or overly reactive to environmental sounds	
98.	Covers ears when hearing very distant or barely audible sounds	
99.	Does not respond to loud noises very close to him/her	
100.	Is unable to visually focus on a particular activity when auditory distracters are present.	
101.	Uses peripheral vision when looking at something or someone	
102.	Is preoccupied by visual stimuli	.428
103.	Is unable to focus on a particular activity when specific visual stimulus is present	.433
104.	Demonstrates fear of certain visual stimuli	.438
105.	Is overly responsive to being lightly touched	.442
106.	Has difficulty tolerating different textures that are normally found in clothing,	
	fabrics, or food	.446
107.	Is unresponsive to pain	.449
108.	Harms self in order to gain tactile input	
109.	Eats inedible materials	
110.	Craves deep pressure	
111.	Overly sensitive to different smells	
112.	Seeks out different smells	
113.	Does not respond to strong smells	
114.	Craves particular food tastes	
115.	Will only eat very bland foods	
116.	Is unable to accept/tolerate specific movement activities	
117.	Seeks out unusual risk-taking activities to meet sensory needs	
118.	Lacks awareness of safety concerns and shows no fear of hazardous situations	
119.	Exhibits persistent fear of harmless events or objects, even after repeated experience	
120.	Exhibits unusual fear of specific, unfamiliar environmental stimuli	
121.	Exhibits unusual fear of noisy, crowded places	
122.	Exhibits unusual fear of big, open spaces and buildings	.504

## I. Using the Autism Spectrum Disorder Intervention Manual in conjunction with the companion evaluation scale

\*NOTE: If the *Autism Spectrum Disorder Intervention Manual* is not being used in conjunction with the companion evaluation scale, the following procedural steps need not be followed.

- Step 1: The student is rated with the school version of the companion evaluation scale.
- Step 2: Conversions of raw scores on the evaluation scale are made. Subscale standard scores, domain quotient and percentile scores are determined; and the companion evaluation scale *Profile Sheet* is completed.
- Step 3: Determine on which of nine characteristics (subscales) the student scores one or more standard deviations below the mean.
- Step 4: For each of the characteristics on which the student scored one standard deviation or more below the mean, determine which behaviors constitute a primary concern in the educational environment (the behaviors with the higher raw scores).
- Step 5: Find goals and objectives from the *Autism Spectrum Disorder Intervention Manual* which represent behavior indicated as a primary concern on the companion evaluation scale.
- Step 6: Determine those interventions from the *Autism Spectrum Disorder Intervention Manual* which are most appropriate in facilitating the student's success in meeting the goals and objectives chosen in Step 5.
- Step 7: If there are any behaviors which are of concern on subscales other than those with standard scores more than one standard deviation below the mean; goals, objectives, and interventions should also be selected for those behaviors.
- Step 8: Share those goals, objectives, and intervention strategies selected for the student with all personnel involved in the student's educational program.

### II. Goals, Objectives, and Interventions

#### Appears not to hear others' social initiations 1

#### Goals:

- 1. The student will increase his/her interactions with peers.
- 2. The student will actively involve himself/herself in social situations which require interpersonal exchanges.
- 3. The student will communicate with others in an acceptable manner in the classroom.
- 4. The student will give logical and relevant verbal responses to questions.
- 5. The student will give logical and relevant verbal responses during conversations.
- 6. The student will improve the ability to express himself/herself verbally.
- 7. The student will interact with others.
- 8. The student will voluntarily, actively participate in social situations.

$\alpha$	
Ohi	ectives:

jectives:				
1.	The student will verbally respond to out of questions asked by a peer.			
2.	The student will carry on friendly conversations with others on out of occasions.			
3.	The student will communicate verbally in group games on out of trials.			
4.	The student will contribute his/her opinion/answer after being recognized by the teacher on			
	out of trials.			
5.	The student will demonstrate peer interaction skills by sharing materials, waiting his/her turn,			
	and talking in an acceptable manner on out of trials.			
6.	The student will develop interaction skills and use them when interacting with a peer(s) during			
	out of interactions.			
7.	The student will greet others with positive comments on out of occasions.			
8.	The student will interact appropriately with peers in group games with supervision on out			
	of trials.			
9.	The student will interact for minutes per day with the teacher.			
0.	The student will interact with a peer times per day.			
1.	The student will interact with a peer for minutes at a time.			
2.	The student will participate in conversation with adults% of the time he/she is spoken to			
	by an adult.			
13.	The student will participate in conversation with peers% of the time he/she is spoken to			
	by a peer.			
4.	The student will respond in a positive manner to conversations initiated by others on out			
	of occasions.			
5.	The student will respond in a positive manner to conversation initiated by authority figures on			
	out of trials.			
6.	The student will respond to conversational questions from adults% of the time.			
7.	The student will respond to conversational questions from peers% of the time.			

#### **Interventions:**

- 1. Help the student perform appropriate interactions with the use of a shadow person to give verbal cues.
- **2.** Say the student's name first and then speak to him/her.
- **3.** Interrupt the student's line of sight (e.g., get on eye level with the student, physically place yourself in his/her line of vision).
- **4.** Use videos created by familiar individuals to teach information regarding social skills.
- **5.** Provide the student with a peer who is able to assist him/her to make appropriate social comments or actions.
- **6.** Use social stories to instruct the student on how to interact/react in specific situations.
- 7. Provide instruction regarding appropriate social skills.
